City of Larkspur 2013 CALGreen Checklist Nonresidential New Construction

This form is effective January 1, 2014, and applies to newly constructed nonresidential buildings without sleeping accommodations. Additions and alterations to existing structures¹ are also subject to the requirements of CALGreen but are not included in this checklist. Existing site and landscaping improvements that are not otherwise disturbed are not subject to the requirements of CALGreen.

Project Address: _____

Project Name: _____

Project Description: _____

INSTRUCTIONS:

1. The owner/owner's agent and the design professional, as required, shall initially complete **Columns 1 and 2** of this checklist, sign and date the **Design Verification** section at the end of this checklist for submission of permit application. Larkspur plans examiners shall review checklist for compliance. The approved checklist shall be printed on the project plans as a prerequisite for plan approval.
2. Prior to final inspection by the Building Department, the Building Inspector shall complete **Column 3** and sign or initial, and date the **Implementation Verification** section at the end of this checklist.

¹ Where more than seventy five percent (75%) of all existing walls of an existing structure are demolished or deconstructed the structure shall be treated as a new building.

Planning and Building: (415) 927-5038	Parks and Recreation: (415) 927-6746	Library: (415) 927-5005
Public Works: (415) 927-5017	Central Marin Police: (415) 927-5150	Fire: (415) 927-5110

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p align="center">PLANNING AND DESIGN</p>	<p align="center"><i>All checked items are required for the project</i></p>	<p align="center"><i>Select at least one (1) elective measure from A5.1</i></p>	<p align="center"><i>Select all measures verified in the completed project</i></p>
<p>SITE SELECTION</p>			
<p>A5.103.1 Community connectivity. Locate project on a previously developed site within a 1/2 mile radius of at least ten basic services (as listed in Section A5.103.1) and readily accessible by pedestrians.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>A5.103.2 Brownfield or greyfield site redevelopment or infill area development. Select for development a brownfield in accordance with Section A5.103.2.1 or on a greyfield or infill site as defined in Section A5.102.</p> <p>A5.103.3.1 Brownfield redevelopment. Develop a site documented as contaminated and fully remediated or on a site defined as a brownfield.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>SITE PRESERVATION</p>			
<p>A5.104.1.1 Local zoning requirement in place. Exceed the zoning's open space requirement for vegetated open space on the site by 25 percent.</p> <p>A5.104.1.2 No local zoning requirement in place. Provide vegetated open space area adjacent to the building equal to the building footprint area.</p> <p>A5.104.1.3 No open space required in zoning ordinance. Provide vegetated open space equal to 20 percent of the total project site area.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>DECONSTRUCTION AND REUSE OF EXISTING STRUCTURES</p>			

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.105.1.1 Existing building structure. Maintain at least 75 percent of existing building structure (including structural floor and roof decking) and envelope (exterior skin and framing) based on surface area.</p> <p>Exceptions:</p> <ol style="list-style-type: none"> Window assemblies and non-structural roofing material. Hazardous materials that are remediated as a part of the project. A project with an addition of more than 2 times the square footage of the existing building. 		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>A5.105.1.2 Existing non-structural elements. Reuse existing interior non-structural elements (interior walls, doors, floor coverings and ceiling systems) in at least 50 percent of the area of the completed building (including additions).</p> <p>Exception: A project with an addition of more than 2 times the square footage of the existing building.</p> <p>A5.105.1.3 Salvage. Salvage additional items in good condition such as light fixtures, plumbing fixtures, and doors for reuse on this project in an onsite storage area or for salvage in dedicated collection bins. Document the weight or number of the items salvaged.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>SITE DEVELOPMENT</p>			
<p>A5.106.1 Storm water pollution prevention plan. For projects of one acre or less, develop a Storm Water Pollution Prevention Plan (SWPPP) that has been designed, specific to its site, conforming to the State Storm water NPDES Construction Permit or local ordinance, whichever is stricter, as is required for projects over one acre. The plan should cover prevention of soil loss by storm water run-off and/or wind erosion, of sedimentation, and/or of dust/particulate matter air pollution.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.106.2 Storm water design. Design storm water runoff rate and quantity in conformance with Section A5.106.3.1 and storm water runoff quality by Section A5.106.3.2, or by local requirements, whichever are stricter.</p> <p>A5.106.2.1 Storm water runoff rate and quantity. Implement a storm water management plan resulting in no net increase in rate and quantity of storm water runoff from existing to developed conditions.</p> <p>Exception: If the site is already greater than 50 percent impervious, implement a storm water management plan resulting in a 25 percent decrease in rate and quantity.</p> <p>A5.106.2.2 Storm water runoff quality. Use post construction treatment control best management practices (BMPs) to mitigate (infiltrate, filter, or treat) storm water runoff from the 85th percentile 24-hour runoff event (for volume-based BMPs) or the runoff produced by a rain event equal to two times the 85th percentile hourly intensity (for flow-based BMPs).</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.106.3 Low impact development (LID). Reduce peak runoff in compliance with Section 5.106.3.1. Employ <u>at least two</u> of the following methods or other best management practices to allow rainwater to soak into the ground, evaporate into the air, or collect in storage receptacles for irrigation or other beneficial uses. LID strategies include, but are not limited to those listed in A5.106.4.</p> <ol style="list-style-type: none"> 1. Bioretention (rain gardens) 2. Cisterns and rain barrels 3. Green roofs 4. Roof leader disconnection 5. Permeable and porous paving 6. Vegetative swales and filter strips & tree preservation 7. Volume retention suitable for previously developed sites 		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>5.106.4 Bicycle parking and changing rooms.</p> <p>5.106.4.1.1 Short-term bicycle parking. If the project is anticipated to generate visitor traffic, provide permanently anchored bicycle racks within 200 feet of the visitors' entrance, readily visible to passers-by, for 5 percent of visitor motorized vehicle parking capacity, with a minimum of one two-bike capacity rack.</p> <p>5.106.4.1.2 Long-term bicycle parking. For buildings with over 10 tenant-occupants, provide secure bicycle parking for 5 percent of tenant-occupied motorized vehicle parking capacity being added, with a minimum of one space.</p> <p>A5.106.4.3 Changing rooms. For buildings with over 10 tenant-occupants, provide changing/shower facilities in accordance with Table 5.106.4.3, or document arrangements with nearby changing/shower facilities.</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.106.5.1 Designated parking for fuel-efficient vehicles. Provide designated parking for any combination of low-emitting, fuel-efficient, and carpool/van pool vehicles as shown in Table A5.106.5.1.1 for 10 percent of total spaces. (Tier 1)</p> <p>5.106.5.2 Designated parking. Provide designated parking for any combination of low-emitting, fuel-efficient and carpool/van pool vehicles as shown in Table 5.106.5.2.</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.106.5.3.1 Electric vehicle supply wiring. When only a single charging space is required, install a listed raceway capable of accommodating a dedicated branch circuit. The raceway shall not be less than trade size 1. The raceway shall be securely fastened at the main service or subpanel and shall terminate in close proximity to the proposed location of the charging system into a listed cabinet, box or enclosure.</p> <p>Exception: Other pre-installation methods approved by the local enforcing agency that provide sufficient conductor sizing and service capacity to install Level 2 EVSE.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>A5.106.5.3.2 Multiple charging spaces required. When multiple spaces are required, plans shall include the location(s) and type of the EVSE, raceway method(s), wiring schematics and electrical calculations to verify that the electrical system has sufficient capacity to charge simultaneously all the electrical vehicles at all designated EV charging spaces at their full rated amperage. Plan design shall be based upon Level 2 EVSE at its maximum operating ampacity. Provide raceways from the electrical service panel to the designated parking areas which are required to be installed at the time of construction.</p> <p>Note: Utilities may have additional requirements for metering and EVSE installation, and should be consulted during the project design and installation.</p> <p>A5.106.5.3.3 Tier 1. At least 3% of the total parking spaces, but not less than one, shall be capable of supporting installation of future electric vehicle supply equipment (EVSE).</p> <p>A5.106.5.3.5 Labeling requirement. A label stating “EV CHARGE CAPABLE” shall be posted in a conspicuous place at the service panel or subpanel and the EV charging space.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.106.6 Parking capacity. Design parking capacity to meet but not exceed minimum local zoning requirements.</p> <p>A5.106.6.1 Reduce parking capacity. With the approval of the enforcement authority, employ strategies to reduce on site parking area by</p> <ol style="list-style-type: none"> 1. Use of on street parking or compact spaces, illustrated on the site plan, or 2. Implementation and documentation of programs that encourage occupants to carpool, ride share, or use alternate transportation. 		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.106.7 Exterior walls. Meet requirements in the current edition of the <i>California Energy Code</i> and comply with either Section A5.106.7.1 or A5.106.7.2 for wall surfaces:</p> <p>A5.106.7.1 Fenestration. Provide vegetative or man-made shading devices for east-, south-, and west-facing walls with windows.</p> <p>A5.106.7.1.1 East and west walls. Shading devices shall have 30% coverage to a height of 20 feet or to the top of the exterior wall, whichever is less.</p> <p>A5.106.7.1.2 South walls. Shading devices shall have 60% coverage to a height of 20 feet or to the top of the exterior wall, whichever is less.</p> <p>A5.106.7.2 Opaque wall areas. Use wall surfacing with SRI 25 (aged), for 75% of opaque wall areas.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>5.106.8 Light pollution reduction. Outdoor lighting systems shall be designed and installed to comply with the following:</p> <ol style="list-style-type: none"> 1. The minimum requirements in the <i>California Energy Code</i> and for lighting zones 1-4 as defined in Chapter 10 of the <i>California Administrative Code</i>; and 2. Backlight, Uplight and Glare (BUG) ratings as defined in IESNA TM-15-11; and 3. Allowable BUG ratings not exceeding those shown in Table 5.106.8. <p>Exceptions:</p> <ol style="list-style-type: none"> 1. Luminaires that qualify as exceptions in Section 147 of the <i>California Energy Code</i>. 2. Emergency lighting 	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>5.106.10 Grading and Paving. Construction plans shall indicate how site grading or a drainage system will manage all surface water from entering buildings. Examples of methods to manage surface water include those shown in Items 1-5.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p align="center">WATER EFFICIENCY AND CONSERVATION</p>	<p align="center"><i>All checked items are required for the project</i></p>	<p align="center"><i>Select at least one (1) elective measure from A5.3</i></p>	<p align="center"><i>Select all measures verified in the completed project</i></p>

<p>INDOOR WATER USE</p>			
<p>5.303.1 Meters. Separate meters shall be installed for the uses described in Sections 5.303.1.1 and 5.303.1.2.</p> <p>5.303.1.1 New buildings in excess of 50,000 square feet. Separate submeters shall be installed as follows:</p> <ol style="list-style-type: none"> 1. For each individual leased, rented, or other tenant space within the building projected to consume more than 100 gal/day. <input checked="" type="checkbox"/> 2. Where separate submeters for individual building tenants are unfeasible, for water supplied to the following subsystems: <ol style="list-style-type: none"> a. Makeup water for cooling towers where flow through is greater than 500 gpm <input checked="" type="checkbox"/> b. Makeup water for evaporator coolers greater than 6 gpm <input checked="" type="checkbox"/> c. Steam and hot-water boilers with energy input more than 500,000 Btu/hr <input checked="" type="checkbox"/> <p>5.303.1.2 Excess consumption. Any building within a project or space within a building that is projected to consume more than 1,000 gal/day. <input checked="" type="checkbox"/></p>			<p align="center"><input type="checkbox"/></p>
<p>5.303.2 Water reduction. Plumbing fixtures shall meet the maximum flow rate values shown in Table 5.303.2.3.</p> <p>Exception: Buildings that demonstrate 20% overall water use reduction. In this case, a calculation demonstrating a 20% reduction in the building “water use baseline,” as established in Table 5.303.2.2, shall be provided.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.303.4 Wastewater reduction. Each building shall reduce the generation of wastewater by <u>one</u> of the following methods:</p> <p>1. The installation of water-conserving fixtures</p> <p align="center">OR</p> <p>2. Utilizing non-potable water systems</p>	<p align="center">As applicable</p> <p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.303.5 Dual plumbing. New buildings and facilities shall be dual plumbed for potable and recycled water systems.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>5.303.6 Standards for plumbing fixtures and fittings. Plumbing fixtures and fittings shall be installed in accordance with the <i>California Plumbing Code</i>, and shall meet the applicable standards referenced in Table 1401.1 of the <i>California Plumbing Code</i> and in Chapter 6 of this code.</p>	<p align="center">As applicable</p> <p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>OUTDOOR WATER USE³</p>			
<p>5.304.1 Water budget. A water budget shall be developed for landscape irrigation use in accordance with Marin Municipal Water District Standards.</p> <p>5.304.2 Outdoor potable water use. For new water service, separate meters or submeters shall be installed for indoor and outdoor potable water use for landscaped areas of at least 1,000 sf but not more than 5,000 sf.</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.304.2.1 Outdoor potable water use. For new water service not subject to the provisions of Water Code Section 535 (i.e. single-family residential connections), separate meters or submeters are installed for indoor and outdoor potable water use for landscaped areas between 500 square feet and 1,000 square feet.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.304.3 Irrigation design. In new nonresidential projects with at least 1,000 sf but not more than 2,500 sf of landscaped area (the level at which the MLO applies), install irrigation controllers and sensors which include the following criteria and meet manufacturer's recommendations.</p> <p>5.304.3.1 Irrigation controllers. Automatic irrigation system controllers installed at the time of final inspection shall comply with the following:</p> <ol style="list-style-type: none"> 1. Controllers shall be weather- or soil moisture-based controllers that automatically adjust irrigation in response to changes in plants' needs as weather conditions change. 2. Weather-based controllers without integral rain sensors or communication systems that account for local rainfall shall have a separate wired or wireless rain sensor which connects or communicates with the controller(s). Soil moisture-based controllers are not required to have rain sensor input. 	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>A5.304.4.1 Potable water reduction. Provide water efficient landscape irrigation design that reduces the use of potable water to a quantity that does not exceed 60% of the ETo times the landscape area.</p> <p>A5.304.4.3 Verification of compliance. A calculation demonstrating the applicable potable water use reduction required by this section shall be provided.</p>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/> <input type="checkbox"/>
<p>A5.304.5 Potable water elimination. Provide a water efficient landscape irrigation design that eliminates the use of potable water beyond the initial requirements for plant installation and establishment. Methods used to accomplish the requirements of this section shall include, but not be limited to, the items listed in A5.304.4.</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>A5.304.6 Restoration of areas disturbed by construction. Restore all areas disturbed during construction by planting with local native and/or non-invasive vegetation.</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>A5.304.7 Previously developed sites. On previously developed or graded sites, restore or protect at least 50% of the site area with native and/or non-invasive vegetation.</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>A5.304.8 Graywater irrigation system. Install graywater collection system for onsite subsurface irrigation using graywater.</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<p>WATER REUSE</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.305.1 Nonpotable water systems. Nonpotable water systems for indoor and outdoor use shall comply with the current edition of the <i>California Plumbing Code</i>.</p> <p>A5.305.2 Irrigation systems. Irrigation systems regulated by Sonoma County Code Chapter 7D3 regarding Water Efficient Landscape or by the California Department of Water Resources Model Water Efficiency Landscape Ordinance (MWELO) shall use recycled water.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>MATERIAL CONSERVATION AND RESOURCE EFFICIENCY</p>	<p align="center"><i>All checked items are required for the project</i></p>	<p align="center"><i>Select at least one (1) elective measure from A5.4</i></p>	<p align="center"><i>Select all measures verified in the completed project</i></p>
<p>EFFICIENT FRAMING SYSTEMS</p>			
<p>A5.404.1 Wood framing. Employ advanced wood framing techniques, or OVE, as permitted by the enforcing agency.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>MATERIAL SOURCES</p>			
<p>A5.405.1 Regional materials. Select building materials or products for permanent installation on the project that have been harvested or manufactured in California or within 500 miles of the project site, meeting the criteria listed in A5.405.1.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>A5.405.2 Bio-based materials. Select bio-based building materials per Section A5.405.2.1 or A5.405.2.2.</p> <p>A5.405.2.1 Use certified wood products. Certified wood is an important component of green building strategies and the California Building Standards Commission will continue to develop a standard through the next code cycle.</p> <p>A5.405.2.2 Rapidly renewable materials. Use materials made from plants harvested within a ten-year cycle for at least 2.5 percent of total materials value, based on estimated cost.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.405.3 Reused materials. Use salvaged, refurbished, refinished, or reused materials for at least 5 percent of the total value, based on estimated cost of materials on the project.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.405.4 Recycled content. Use materials, equivalent in performance to virgin materials, with post-consumer or pre-consumer recycled content value (RCV) equaling at least 10 percent of the total value, based on estimated cost of materials on the project.</p> <p>Note: Use the equations in the subsections for calculating total materials cost, recycled content, RCV of materials and assemblies, and total RCV.</p>	<input checked="" type="checkbox"/>		<input type="checkbox"/>
<p>A5.405.5 Cement and concrete. Use cement and concrete made with recycled products and complying with the following sections:</p> <p>A5.405.5.1 Cement. Meet the following standards for cement:</p> <ol style="list-style-type: none"> 1. Portland cement shall meet ASTM C 150. 2. Blended hydraulic cement shall meet ASTM C 595. 3. Other hydraulic cements shall meet ASTM C 1157 <p>A5.405.5.2 Concrete. Unless otherwise directed by the engineer, use concrete manufactured with cementitious materials in accordance with Sections A5.405.5.2.1 and A5.405.5.2.2, as approved by the enforcing agency.</p> <p>A5.405.5.2.1 Supplementary cementitious materials (SCMs). Use concrete made with one or more of the SCMs listed in Section A5.405.5.2.1</p> <p>A5.405.5.2.1.1 Mix design equation. Use any combination of one or more SCMs, satisfying Equation A4.5-1.</p> <p>Exception: Minimums in mix designs approved by the Engineer of Record may be lower where high early strength is needed.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.405.5.3 Additional means of compliance. Any of the following measures may be employed for the production of cement or concrete, depending on their availability and suitability, in conjunction with A5.405.5.2.</p> <p>A5.405.5.3.1 Cement. The following measures may be used in the manufacture of cement:</p> <p>A5.405.5.3.1.1 Alternative fuels. Where permitted by state or local air quality standards.</p> <p>A5.405.5.3.1.2 Alternative power. Alternate electric power generated at the cement plant and/or green power purchased from the utility meeting the requirements of A5.211.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.405.5.3.2 Concrete. The following measures may be used in the manufacture of concrete:</p> <p>A5.405.5.3.2.1 Alternative energy. Renewable or alternative energy meeting the requirements of Section A5.211.</p> <p>A5.405.5.3.2.2 Recycled aggregates. Use concrete made with one or more of the materials listed in Section A5.405.5.3.2.2.</p> <p>A5.405.5.3.2.3 Mixing water. Water recycled by the local water purveyor or water reclaimed from manufacturing processes and conforming to ASTM C 1602.</p> <p>A5.405.5.3.2.4 High strength concrete. Concrete elements designed to reduce their total size compared to standard 3,000 psi concrete, as approved by the Engineer-of-Record.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>ENHANCED DURABILITY AND REDUCED MAINTENANCE</p>			
<p>A5.406.1.1 Service life. Select materials for longevity and minimal deterioration under conditions of use.</p> <p>A5.406.1.2 Reduced maintenance. Select materials that require little, if any, finishing.</p> <p>A5.406.1.3 Recyclability. Select materials that can be re-used or recycled at the end of their service life.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>WEATHER RESISTANCE AND MOISTURE MANAGEMENT</p>			
<p>A5.407.1 Weather protection. Provide a weather-resistant exterior wall and foundation envelope as required by <i>California Building Code</i> Section 1403.2, <i>California Energy Code</i> Section 150 or manufacturer's installation instructions, whichever is more stringent.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>A5.407.2 Moisture control. Employ moisture control measures by the following methods:</p> <p>5.407.2.1 Sprinklers. Prevent irrigation spray on structures.</p> <p>5.407.2.2 Entries and openings. Design exterior entries and openings to prevent water intrusion into buildings.</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>CONSTRUCTION WASTE REDUCTION, DISPOSAL AND RECYCLING</p>			

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.408.1 Construction waste management. Recycle and/or salvage for reuse a minimum of 50% of the non-hazardous construction waste in accordance with Sections 5.408.1.1, 5.408.1.2 or 5.408.1.3.</p> <p>5.408.1.1 Construction waste management plan. Submit a construction waste management plan that complies with Items 1 through 4 of this section.</p> <p>5.408.1.2 Waste management company. Utilize a waste management company that can provide verifiable documentation that the percentage of construction waste material diverted from the landfill complies with this section.</p> <p>Exceptions to Sections 5.408.1.1 and 5.408.1.2:</p> <ol style="list-style-type: none"> Excavated soil and land-clearing debris. Alternate waste reduction methods developed by working with local agencies if diversion or recycle facilities capable of compliance with this item do not exist. Demolition waste calculated in consideration of local recycling facilities and markets. <p>5.408.1.3 Waste stream reduction alternative. The combined weight of new construction disposal that does not exceed 2 psf of building area may be deemed to meet the 50% minimum as approved by the enforcing agency.</p> <p>5.408.1.4 Documentation. Provide documentation of the waste management plan that meets the requirements listed in Section 5.408.1.1 through 5.408.1.3, and the plan is accessible to the enforcement authority.</p> <p>5.408.3 Excavated soil and land clearing debris. 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled.</p> <p>Exception: Reuse, either on- or off-site, of vegetation or soil contaminated by disease or pest infestation.</p> <p>A5.408.3.1 Enhanced Construction waste. Divert to recycle and/or salvage at least 65% of non-hazardous construction and demolition waste generated at the site.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>A5.408.3.1.2 Verification of compliance. A copy of the completed waste management report or documentation of certification shall be provided.</p> <p>Exceptions:</p> <ol style="list-style-type: none"> Excavated soil and land-clearing debris. Alternate waste reduction methods developed by working with local agencies if diversion or recycle facilities capable of compliance with this item do not exist. Demolition waste calculated in consideration of local recycling facilities and markets. 	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.410.2 Commissioning. For new buildings 10,000 sf and over, building commissioning for all building systems covered by T24, Part 6, process systems and renewable energy systems shall be included in the design and construction processes of the building project. Commissioning requirements shall include items listed in 5.410.2.</p> <p>Exceptions:</p> <ol style="list-style-type: none"> Dry storage warehouse of any size Areas under 10,000 sf used for offices or other conditioned accessory spaces within dry storage warehouses TI's under 10,000 sf as described in Section 303.1.1 <p>5.410.2.1 Owner's Project Requirements (OPR). Documented before the design phase of the project begins the OPR shall include items listed in 5.410.4.</p> <p>5.410.2.2 Basis of Design (BOD). A written explanation of how the design of the building systems meets the OPR shall be completed at the design phase of the building project to cover the systems listed in 5.410.2.2.</p> <p>5.410.2.3 Commissioning plan. A commissioning plan describing how the project will be commissioned shall include items listed in 5.410.2.3.</p> <p>5.410.2.4 Functional performance testing. Functional performance tests shall demonstrate the correct installation and operation of each component, system, and system-to-system interface in accordance with the approved plans and specifications.</p> <p>5.410.2.5 Documentation and training. A systems manual and systems operations training are required.</p> <p>5.410.2.5.1 Systems manual. The systems manual and shall be delivered to the building owner or representative and facilities operator and shall include the items listed in 5.410.2.5.1.</p> <p>5.410.2.5.2 Systems operations training. A program for training of the appropriate maintenance staff for each equipment type and/or system shall be developed and shall include items listed in 5.410.2.5.2.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>5.410.2.6 Commissioning report. A report of commissioning process activities undertaken through the design and construction phases of the building project shall be completed and provided to the owner or representative.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>

Column 1 Feature or Measure	Column 2 Project Requirements <i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i>		Column 3 Verification <i>Complete prior to final inspection approval</i>
<i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i>	Mandatory Requirements	Tier 1 electives <i>Applicant selects elective measure(s)</i>	Verification by Building Inspector
<p>5.410.4 Testing and adjusting. Testing and adjusting of systems shall be required for buildings less than 10,000 square feet.</p> <p>5.410.4.2 Systems. Develop a written plan of procedures for testing and adjusting systems. Systems to be included for testing and adjusting shall include, as applicable to the project, the systems listed in 5.410.4.2.</p> <p>5.410.4.3 Procedures. Perform testing and adjusting procedures in accordance with applicable standards on each system.</p> <p>5.410.4.3.1 HVAC balancing. Before a new space-conditioning system serving a building or space is operated for normal use, balance in accordance with the procedures defined by national standards listed in 5.410.4.3.1.</p> <p>5.410.4.4 Reporting. After completion of testing, adjusting and balancing, provide a final report of testing signed by the individual responsible for performing these services.</p> <p>5.410.4.5 Operation and maintenance manual. Provide the building owner with detailed operating and maintenance instructions and copies of guaranties/warranties for each system prior to final inspection.</p> <p>5.410.4.5.1 Inspections and reports. Include a copy of all inspection verifications and reports to the enforcing agency.</p>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
A5.5 ENVIRONMENTAL QUALITY	<i>All checked items are required for the project</i>	<i>Select at least one (1) elective measure from A5.5</i>	<i>Select all measures verified in the completed project</i>
FIREPLACES⁵			
<p>5.503.1. Install only a direct-vent sealed-combustion gas or sealed wood-burning fireplace, or a sealed woodstove and refer to residential requirements in the <i>California Energy Code</i>, Title 24, Part 6, Subchapter 7, Section 150.</p> <p>5.503.1.1 Woodstoves. Woodstoves shall comply with US EPA Phase II emission limits.</p>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>		<input type="checkbox"/> <input type="checkbox"/>
POLLUTANT CONTROL			

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>

<p>INDOOR MOISTURE AND RADON CONTROL</p>			
<p>5.505.1 Indoor moisture control. Buildings shall meet or exceed the provisions of <i>California Building Code</i>, CCR, Title 24, Part 2, Sections 1203 and Chapter 14.1.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>AIR QUALITY AND EXHAUST</p>			
<p>5.506.1 Outside air delivery. For mechanically or naturally ventilated spaces in buildings, meet the minimum requirements of Section 121 of the <i>California Energy Code</i>, CCR, Title 24, Part 6 and Chapter 4 of CCR, Title 8.</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>5.506.2 Carbon dioxide (CO2) monitoring. For buildings equipped with demand control ventilation, CO2 sensors and ventilation controls shall be specified and installed in accordance with the requirements of the <i>California Energy Code</i>, CCR, Title 24, Part 6, Section 121(c)(4).</p>	<p align="center"><input checked="" type="checkbox"/></p>		<p align="center"><input type="checkbox"/></p>
<p>ENVIRONMENTAL COMFORT</p>			
<p>A5.507.1 Lighting and thermal comfort controls. Provide controls in the workplace as described in Sections A5.507.1.1 and A5.507.1.2.</p> <p>A5.507.1.1 Single-occupant spaces. Provide individual controls that meet energy use requirements in the <i>California Energy Code</i> by Sections A5.507.1.1.1 and A5.507.1.1.2.</p> <p>A5.507.1.1.1 Lighting. Provide individual task lighting and/or daylighting controls for at least 90 percent of the building occupants.</p> <p>A5.507.1.1.2 Thermal comfort. Provide individual thermal comfort controls for at least 50 percent of the building occupants by Items 1 and 2 in A5.507.1.1.2.</p> <p>A5.507.1.2 Multi-occupant spaces. Provide lighting and thermal comfort system controls for all shared multi-occupant spaces.</p>		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>A5.507.2 Daylight. Provide daylit spaces as required for toplighting and sidelighting in the <i>California Energy Code</i>. In constructing a design, consider Items 1 through 4 in A5.507.3.</p>		<p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p>
<p>5.507.4 Acoustical control. Employ building assemblies and components with STC values determined in accordance with ASTM E90 and ASTM E413 or OITC determined in accordance with ASTM E1332, using either prescriptive or performance method in Section 5.507.4.1 or 5.507.4.2.</p>			

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.507.4.1 Exterior noise transmission, prescriptive method. Wall and roof-ceiling assemblies exposed to the noise source making up the building envelope shall meet a composite STC rating of at least 50 or a composite OITC rating of no less than 40, with exterior windows of a minimum STC of 40 or OITC of 30 in building locations listed in Items 1 and 2 in Section 5.507.4.1.</p> <p>5.507.4.1.1 Noise exposure where noise contours are not readily available. Buildings exposed to a noise level of 65 dB during any hour of operation shall have building exterior wall and roof-ceiling assemblies exposed to the noise source meeting a composite STC rating of at least 45 (or OITC 35), with exterior windows of a minimum STC of 40 (or OITC 30).</p> <p>5.507.4.2 Performance method. For buildings located as defined in Sections A5.507.4.1 or A5.507.4.1.1, wall and roof-ceiling assemblies exposed to the noise source making up the building envelope shall be constructed to provide an interior noise environment attributable to exterior sources that does not exceed an hourly equivalent noise level of 50 dBA in occupied areas during any hour of operation.</p> <p>5.507.4.2.1 Site features. Exterior features such as sound walls or earth berms may be utilized as appropriate to the project to mitigate sound migration to the interior.</p> <p>5.507.4.2.2 Documentation of compliance. An acoustical analysis documenting complying interior sound levels shall be prepared by personnel approved by the architect or engineer of record.</p> <p>5.507.4.3 Interior sound transmission. Wall and floor-ceiling assemblies separating tenant spaces, and tenant spaces and public places shall have an STC of at least 40.</p>	<p align="center">☒</p> <p align="center">☒</p> <p align="center">OR</p> <p align="center">☒</p> <p align="center">☒</p> <p align="center">☒</p> <p align="center">☒</p> <p align="center">☒</p>		<p align="center">☐</p> <p align="center">☐</p> <p align="center">OR</p> <p align="center">☐</p> <p align="center">☐</p> <p align="center">☐</p> <p align="center">☐</p>
<p>OUTDOOR AIR QUALITY</p>			
<p>5.508.1 Ozone depletion and global warming reductions. Installations of HVAC, refrigeration and fire suppression equipment shall comply with Sections 5.508.1.1 and 5.508.1.2.</p> <p>5.508.1.1 CFCs. Install HVAC and refrigeration equipment that does not contain CFCs.</p> <p>5.508.1.2 Halons. Install fire suppression equipment that does not contain Halons.</p> <p>A5.508.1.3 Hydrochlorofluorocarbons (HCFCs). Install HVAC and refrigeration equipment that does not contain HCFCs.</p>	<p align="center">☒</p> <p align="center">☒</p>		<p align="center">☐</p> <p align="center">☐</p>

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>A5.508.1.4 Hydrofluorocarbons (HFCs). Install HVAC complying with either of the following:</p> <ol style="list-style-type: none"> 1. Install HVAC, refrigeration and fire suppression equipment that do not contain HFCs or that do not contain HFCs with a global warming potential greater than 150. 2. Install HVAC and refrigeration equipment that limit the use of HFC refrigerant through the use of a secondary heat transfer fluid with a global warming potential no greater than 1. 		<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>	<p align="center"><input type="checkbox"/></p> <p align="center"><input type="checkbox"/></p>
<p>5.508.2 Supermarket refrigerant leak reduction. New commercial refrigeration systems shall comply with the provisions of this section when installed in retail food stores 8,000 square feet or more conditioned area, and that utilize either refrigerated display cases, or walk-in coolers or freezers connected to remote compressor units or condensing units. The leak reduction measures apply to refrigeration systems containing high-global-warming potential (high-GWP) refrigerants with a GWP of 150 or greater.</p> <p>Exception: Refrigeration systems containing low-global warming potential (low-GWP) refrigerant with a GWP value less than 150 are not subject to this section. Low-GWP refrigerants are nonozone-depleting refrigerants that include ammonia, carbon dioxide (CO₂), and potentially other refrigerants.</p> <p>5.508.2.1 Refrigerant piping. Piping compliant with the <i>California Mechanical Code</i> shall be installed to be accessible for leak protection and repairs. Piping runs using threaded pipe, copper tubing with an outside diameter (OD) less than 1/4 inch, flared tubing connections and short radius elbows shall not be used in refrigerant systems except as noted below.</p> <p>5.508.2.1.1 Threaded pipe. Threaded connections are permitted in the compressor rack.</p> <p>5.508.2.1.2 Copper pipe. Copper tubing with an OD less than 1/4 inch may be used in systems with a refrigerant charge of 5 pounds or less.</p> <p>5.508.2.1.2.1 Anchorage. ¼ inch OD tubing shall be securely clamped to a rigid base to keep vibration levels below 8 mils.</p> <p>5.508.2.1.3 Flared tubing connections. Double-flared tubing connections may be used for pressure controls, valve pilot lines and oil.</p> <p>Exception: Single-flared tubing connections may be used with a multi-ring seal coated with an industrial sealant suitable for use with refrigerants and tightened in accordance with manufacturer's recommendations.</p> <p>5.508.2.1.4 Elbows. Short radius elbows are only permitted where space limitations prohibit use of long radius elbows.</p> <p>5.508.2.2 Valves. Valves and fittings shall comply with the <i>California Mechanical Code</i> and as follows:</p>	<p align="center"><input checked="" type="checkbox"/></p> <p align="center">As applicable</p>		

<p align="center">Column 1 Feature or Measure</p>	<p align="center">Column 2 Project Requirements</p> <p align="center"><i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i></p>		<p align="center">Column 3 Verification</p> <p align="center"><i>Complete prior to final inspection approval</i></p>
<p align="center"><i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i></p>	<p align="center">Mandatory Requirements</p>	<p align="center">Tier 1 electives <i>Applicant selects elective measure(s)</i></p>	<p align="center">Verification by Building Inspector</p>
<p>5.508.2.2.1 Pressure Relief Valves. For vessels containing high-GWP refrigerant, a rupture disc shall be installed between the outlet of the vessel and the inlet of the pressure relief valve.</p>			
<p>5.508.2.2.1.1 Pressure Detection. A pressure gauge, pressure transducer or other device shall be installed in the space between the rupture disc and the relief valve inlet to indicate a disc rupture or discharge of the relief valve.</p> <p>5.508.2.2.2 Access valves. Only Schrader access valves with a brass or steel body are permitted for use.</p> <p>5.508.2.2.2.1 Valve caps. For systems with refrigerant charge of 5 pounds or more, valve caps shall be brass or steel and not plastic.</p> <p>5.508.2.2.2.2 Seal caps. If designed for it, the cap shall have a neoprene O-ring in place.</p> <p>5.508.2.2.2.2.1 Chain tethers. Chain tethers to fit over the stem are required for valves designed to have seal caps.</p> <p>Exception: Valves with seal caps that are not removed from the valve during stem operation.</p> <p>5.508.2.3 Refrigerated service cases. Refrigerated service cases holding food products containing vinegar and salt shall have evaporator coils of corrosion-resistant material, such as stainless steel; or be coated to prevent corrosion from these substances.</p> <p>5.508.2.3.1 Coil coating. Consideration shall be given the heat transfer efficiency of coil coating to maximize energy efficiency.</p> <p>5.508.2.4 Refrigerant receivers. Refrigerant receivers with capacities greater than 200 pounds shall be fitted with a device that indicates the level of refrigerant in the receiver.</p> <p>5.508.2.5 Pressure testing. The system shall be pressure tested during installation prior to evacuation and charging.</p> <p>5.508.2.5.1 Minimum pressure. The system shall be charged with regulated dry nitrogen and appropriate tracer gas to bring system pressure up to 300 psig minimum.</p> <p>5.508.2.5.2 Leaks. Check the system for leaks, repair any leaks and retest for pressure using the same gage.</p> <p>5.508.2.5.3 Allowable pressure change. The system shall stand, unaltered, for 24 hours with no more than +/- one pound pressure change from 300 psig, measured in the same gage.</p> <p>5.508.2.6 Evacuation. The system shall be evacuated after pressure testing and prior to charging.</p> <p>5.508.2.6.1 First vacuum. Pull a system vacuum to at least 1000 microns (+/- 50 microns), and hold 30 minutes.</p> <p>5.508.2.6.2 Second vacuum. Pull a second system vacuum to a minimum of 500 microns and hold 30 minutes.</p>			

Column 1 Feature or Measure	Column 2 Project Requirements <i>When checked, these items become part of the approved plans and must be installed or incorporated into the project.</i>		Column 3 Verification <i>Complete prior to final inspection approval</i>
<i>See Chapter 5 and Appendix A5 of the California Green Building Code for complete descriptions of features or measures listed here.</i>	Mandatory Requirements	Tier 1 electives <i>Applicant selects elective measure(s)</i>	Verification by Building Inspector
5.508.2.6.3 Third Vacuum. Pull a third vacuum to a minimum of 300 microns, and hold for 24 hours with a maximum drift of 100 microns over a 24-hour period.			
ADDITIONAL ELECTIVE MEASURE			
A5.601.2.4 Voluntary measures for CALGreen Tier 1, Item 5. Pursuant to Tier 1 requirements, select one additional Tier 1 elective measure from any division above. The total number of boxes checked under the Tier 1 electives in Column 2 must be at least five (5).	<input checked="" type="checkbox"/>	<hr style="width: 50%; margin: 0 auto;"/> <i>Total elective measures checked</i>	<input type="checkbox"/>
INSTALLER AND SPECIAL INSPECTOR QUALIFICATIONS		<i>All checked items are required for the project</i>	<i>Select all measures verified in the completed project</i>
QUALIFICATIONS			
702.1 Installer training. HVAC system installers are trained and certified in the proper installation of HVAC systems.	<input checked="" type="checkbox"/>		<input type="checkbox"/>
VERIFICATIONS			
703.1 Documentation. Documentation used to show compliance with this code shall include but not be limited to construction documents, plans, specifications, builder or installer certification, inspection reports, or other methods acceptable to the enforcing agency which demonstrate substantial conformance. When specific documentation or special inspection is necessary to verify compliance, that method of compliance will be specified in the appropriate section or identified in the application checklist.	<input checked="" type="checkbox"/>		<input type="checkbox"/>

Green Building Acknowledgments

Project Address: _____

Project Description: _____

Section 1 – Design Verification

Complete all lines of Section 1- "Design Verification" and submit the completed checklist (Columns 1 and 2) with the plans and building permit application to the Building Department.

The owner/owner's agent, design professional and Larkspur Plans Examiner have reviewed the plans and certify that the items checked above are hereby incorporated into the project plans and will be implemented into the project in accordance with the requirements set forth in the *2013 California Green Building Standards Code*.

Section 2 – Implementation Verification

Complete, sign and submit the completed checklist, including Column 3, together with all original signatures on Section 2 – "Implementation Verification" to the Building Department prior to Building Department final inspection.

I have inspected the work have received sufficient documentation to verify and certify that the project identified above was constructed in accordance with this Green Building Checklist and in accordance with the requirements set forth in the *2013 California Green Building Standards Code*.

Inspector Signature
